## FPSB'S FINANCIAL PLANNER COMPETENCY PROFILE

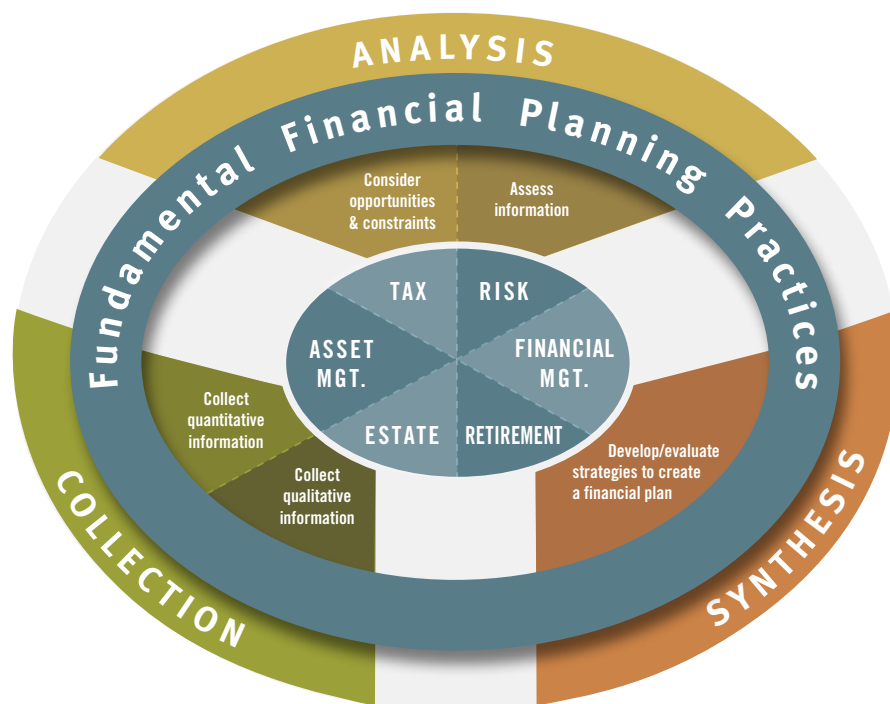

A comprehensive analysis that identifies the abilities, skills and knowledge required to competently perform the tasks of a profession is the cornerstone of a quality professional credentialing program.

FPSB's Financial Planner Competency Profile – comprised of Financial Planner Abilities, Financial Planner Professional Skills and Financial Planning Body of Knowledge – describes the abilities, skills, attitudes, judgments and knowledge that a financial planning professional draws on when working with clients in financial planning engagements. To competently deliver financial planning to a client, a financial planning professional needs to combine the ability to carry out the tasks of financial planning (defined in the Financial Planner Abilities) using appropriate professional skills (defined in the Financial Planner Professional Skills) drawing on his or her knowledge of financial planning matters (defined in the Financial Planning Body of Knowledge). The effective combination of abilities, skills and knowledge is what defines the financial planning professional's performance as competent.

FPSB's Financial Planner Competency Profile reflects what a financial planning professional does today as well as expectations for the financial planning profession over the next five years. The Competency Profile describes the full range of abilities, skills and knowledge needed to competently deliver financial planning to clients. Financial planning professionals who have chosen to specialize or limit the scope of their practice (e.g., in one or two Financial Planning Components such as Estate Planning or Tax Planning) consider the entire set of financial planner abilities to identify which Financial Planner Ability to employ during a client engagement.

In creating its Financial Planner Competency Profile, FPSB described the abilities, skills and knowledge expected of anyone practicing financial planning. FPSB expects that clients of financial planning professionals will benefit from a globally accepted set of competency standards for financial planning professionals.

## FINANCIAL PLANNER ABILITIES

### Sample Financial Planner Ability

*Collection (Asset Management): 1.105 Collects information necessary to prepare a detailed statement of investment holdings.*

Financial planning is the process of developing strategies to assist clients in managing their financial affairs to meet life goals. The process of financial planning involves reviewing all relevant aspects of a client's situation across a large breadth of financial planning activities, including inter-relationships among often conflicting objectives.

FPSB's Financial Planner Abilities defines the complete set of competencies required of a financial planning professional. The Financial Planner Abilities describes the various tasks that financial planning professionals should be able to carry out during financial planning engagements with clients, regardless of practice type, setting or location. The financial planning professional draws on one or more of the Financial Planner Abilities, in addition to job-related skills, attitudes, judgments and knowledge, to competently deliver financial planning to clients.

Regardless of whether the financial planning professional offers comprehensive financial planning or has chosen to limit the scope or level of services (e.g., in one or two components such as Estate Planning or Tax Planning), the financial planning professional needs to be able to master the complete set of abilities required to competently deliver a comprehensive financial plan to a client.

Financial planning professionals should master each of the Financial Planner Abilities at an appropriate level, and will likely work with other professionals in evaluating and assessing various aspects of a client's financial situation (e.g., working with lawyers on estate planning matters, working with accountants on tax planning matters, etc.).

## **FINANCIAL PLANNER ABILITIES FRAMEWORK**

Each Financial Planner Ability describes a task that a financial planning professional performs when providing financial planning to a client. While recognizing the integrated nature of the Financial Planner Abilities and that each Ability could appear under multiple categories, for presentation purposes, FPSB has allocated each Financial Planner Ability vertically to one of three Financial Planning Functions (Collection, Analysis and Synthesis) and horizontally to one of six Financial Planning Components (Financial Management, Asset Management, Risk Management, Tax Planning, Retirement Planning and Estate Planning).

## **FINANCIAL PLANNING FUNCTIONS**

FPSB has categorized the Financial Planner Abilities into three Financial Planning Functions:

### **Collection**

During Collection, the financial planning professional collects the information required to develop a financial plan. Collection goes beyond simply gathering information to also include identifying related facts by making required calculations and arranging client information for analysis.

### **Analysis**

During Analysis, the financial planning professional identifies and considers issues, performs financial analysis and assesses the resulting information to be able to develop strategies for the client.

### **Synthesis**

During Synthesis, the financial planning professional synthesizes the information to develop and evaluate strategies to create a financial plan.

## **CORE FINANCIAL PLANNING COMPETENCIES**

Collection, Analysis and Synthesis can be further defined by Core Financial Planning Competencies.

During Collection, the two Core Financial Planning Competencies are:

1. Collects the quantitative information required to develop a financial plan.
2. Collects the qualitative information required to develop a financial plan.

While each of these Core Financial Planning Competencies has distinct and possibly related Financial Planning Abilities associated with it, both draw on the same Fundamental Financial Planning Practices for the Collection function.

During Analysis, the two Core Financial Planning Competencies are:

1. Considers potential opportunities and constraints to develop strategies.
2. Assesses information to develop strategies.

While each of these Core Financial Planning Competencies also has distinct and possibly related Financial Planner Abilities associated with it, both draw on the same Fundamental Financial Planning Practices for the Analysis function.

During Synthesis, the Core Financial Planning Competency, which draws on the Fundamental Financial Planning Practices for the Synthesis function, is:

1. Develops and evaluates strategies to create a financial plan.

## **FUNDAMENTAL FINANCIAL PLANNING PRACTICES**

The Fundamental Financial Planning Practices represent the competencies that relate to the financial planning professional's ability to:

1. Integrate among the various Core Financial Planning Competencies and Financial Planning Components; and
2. Understand and master the interrelationships among the various Financial Planner Abilities required to carry out a Financial Planning Function.

The financial planning professional will use one or more of the Fundamental Financial Planning Practices when providing financial planning to a client.

## **FINANCIAL PLANNING COMPONENTS**

FPSB has categorized the Financial Planner Abilities into six Financial Planning Components:

1. Financial Management
2. Asset Management
3. Risk Management
4. Tax Planning
5. Retirement Planning
6. Estate Planning

A financial planning professional does not review tax, asset management or retirement needs in isolation when providing financial planning to a client. Similarly, a financial planning professional will incorporate at least one of the Financial Planner Abilities from a particular Financial Planning Function (e.g. Collection) or Component (e.g. Risk Planning) while working on a related, but separate, Function or area of a client's financial situation.

## **FINANCIAL PLANNER PROFESSIONAL SKILLS**

The Professional Skills described in FPSB's Financial Planner Competency Profile identify the skills that a financial planning professional must be able to draw on to deliver advice to clients in financial planning engagements that involve a high degree of trust, uncertainty, complexity and mutual agreement with clients of varying circumstances, or when interacting with colleagues or others in a professional capacity.

Central to FPSB's concept of professionalism is the need for a financial planning professional to use his or her Professional Skills to work in the interest of clients and to uphold and promote the interests of the financial planning profession for the benefit of society.

FPSB categorized the Professional Skills required of a financial planning professional into four areas:

1. Professional Responsibility
2. Practice
3. Communication
4. Cognitive

Within each Skill category, FPSB identified various components that indicate the practitioner has delivered financial planning at an appropriate level of competence and professionalism.

A financial planning professional needs to be able to seamlessly integrate one or more of the Professional Skills with appropriate knowledge and abilities into each of his or her professional actions and interactions, and commit to continually updating his Professional Skills to maintain competency in the field of financial planning.

A financial planning professional can use one or more of the Professional Skills to competently perform any Financial Planner Ability.

While some of the Professional Skills are specific to financial planning, many are common to all professions.

## **FINANCIAL PLANNING BODY OF KNOWLEDGE**

The ability to effectively practice as a financial planning professional requires a person to master theoretical and practical knowledge in a broad range of financial planning and related topics. Once a person has mastered the Financial Planning Body of Knowledge, he or she can combine that knowledge with professional skills and abilities to competently deliver financial planning.

Mastery of the financial planning profession's body of knowledge allows the financial planning professional to gain the respect and trust of clients, and builds the financial planning professional's confidence in his or her ability to competently practice.

## **FINANCIAL PLANNING BODY OF KNOWLEDGE FRAMEWORK**

FPSB's Financial Planning Body of Knowledge identifies the knowledge a financial planning professional must be able to draw on to deliver financial planning to clients, or when interacting with colleagues or others in a professional capacity.

FPSB categorized the Financial Planning Body of Knowledge into 11 areas:

- I. Taxation
- II. Insurance
- III. Investment
- IV. Retirement, Savings and Income Programs
- V. Law
- VI. Financial Analysis
- VII. Debt
- VIII. Economic and Regulatory Environment
